

**AMENDMENTS TO THE CLAIMS**

**This listing of claims will replace all prior versions and listings of claims in the application:**

**LISTING OF CLAIMS:**

Claim 1 (currently amended):        A CVD process for producing preforms for dispersion shifted optical ~~fiber~~ fibers or dispersion compensating optical ~~fiber~~ fibers having a core comprising a central portion, an inner cladding, a ring, and an outer cladding, by depositing layers, in which process the layers of said preform corresponding to said inner cladding and to said ring of said optical fiber have a phosphorus content in the range of 0.03 wt% to 0.1 wt%~~not greater than 0.1 wt%~~, wherein said CVD process is a furnace chemical vapor deposition (FCVD) process.

Claim 2        (canceled).

Claim 3 (original):    The optical fiber preform production process claimed in claim 1 wherein said layers of said preform corresponding to said outer cladding of said optical fiber have a phosphorus content in the same range of values as said layers of said preform corresponding to said inner cladding and to said ring of said optical fiber.

Claim 4 (original):    The optical fiber preform production process claimed in claim 1 wherein said layers are deposited at a pressure within 20% of atmospheric pressure.

Amendment Under 37 C.F.R. § 1.111  
Serial No.: 10/720,670  
SUGHRUE MION, PLLC Ref: Q78568

Claim 5 (original): The optical fiber preform production process claimed in claim 1,  
when said optical fiber is intended to be integrated into a submarine cable.
